Managing Biodiversity to Increase Returns from Landscape Investments: Value Chains for Local Crop Varieties, focusing on Durum Wheat

AGREED ETHIOPIA GRANI ANTICHI

Ethiopia

Project Objectives:

The overall goal of promoting traditional varieties is to develop a high quality unique product, which can at the same time enhance resilience and adaptation to climate change. In order to enhance the quality of the product and to target healthy food and organic matters, we will also propose organic protocols that can be tested in Ethiopia.

Funding:

World Bank

Start / End:

31/08/2020 - 31/07/2021

Budget:

EUR 83.855
