COMETA

Image not found or type unknown

Project Objectives:

COMETA project's main aim is to systematise the research that has been conducted over years of experiments on Mediterranean crops of interest for green chemistry in order to study and develop new processes and methods to make use of the fractions obtained from these crops and to catalyse new agro-industrial businesses.

Funding:

Start / End:

01/06/2018 - 31/12/2021

Budget:

EUR 9.987.000
