sustainable small-scale fishing
communities

FISHINMED

Image not found or type unknown

Project Objectives:

Fishing is a strategic sector in the Mediterranean area in terms of economic growth and employment. However, several issues may hamper its development on the long run such as low profitability and competitiveness, impact of catch limits on marginal areas characterized by poor job opportunities and lack of an appropriate common strategy at Mediterranean level for small fishing communities. In this complex framework, FISHINMED aimed at protecting and enhancing small fishing communities, thus increasing employment opportunities as well as preventing the
