Project Objectives:

The general objective of the research program was to develop scientific knowledge on the pathogenicity, transmissibility and host susceptibility to the Xf strains recovered in the EU outbreaks, toward the implementation of tools for pest risk assessment, for prevention and reduction of the impact of the Xylella-induced diseases. The research actions were complementary to those carried out under the Project POnTE (<https://www.ponteproject.eu/>), thus ensuring effective cooperation and continuity with currently ongoing efforts.

Funding:

European Union

Start / End:

01/11/2016 - 30/04/2021

Budget:

EUR 6.964.125
