Agroecological Transitions at the scale of Territorial food systems

ATTER

Italy
France
United Kingdom
United States of America
Brazil

Project Objectives:

The overarching objective of ATTER project is to develop an interdisciplinary and multi-sectoral exchange program to help fill the lack of knowledge and methodology for scaling out agroecological transitions at the scale of territorial food systems. Through workshops, training, secondments and devoted collaborative tools, ATTER will build new knowledge about transition pathways in various contexts, and test innovative approaches and tools. To ensure its impact on research and innovation, ATTER will develop knowledge transfer activities, a widely accessible
